

CRYOTECH CMA[®]

Solid Commercial Deicer

BENEFITS

- Less corrosive than tap water
- Safest deicer for concrete, chloride free
- Can be used on new concrete (dependent on quality), cured for at least 30 days
- Excellent inhibitor, reducing chloride corrosion
- Readily biodegradable, low toxicity
- Safer for pets than sodium chloride
- Requires fewer applications than other common deicers
- Can be used straight or mixed with salt, with sand, or as a liquid
- Spherical pellet is less dusty than granular deicers
- Complimentary customer training upon request

PERFORMANCE

- Works best above 20°F (-7°C)
- Has long lasting effect, better than chloride salts or urea
- Breaks/inhibits bond between snow/ice and pavement making snow/ice easier to remove
- Creates some brine and a dry, oatmeal-like consistency with snow for improved traction

ENVIRONMENT

- Biodegrades to carbon dioxide and water
- Safe for vegetation
- Calcium and magnesium increase soil permeability and are soil amendments
- Low toxicity to aquatic species
- Poor mobility in soil, unlikely to reach groundwater
- Safe for groundwater concerns
- Does not contain nitrogen or chlorides

APPLICATION

- Apply early in the storm to prevent snow/ice bonding
- First application:
 - Commercial = 15-20 lbs/1000ft² (75-100 g/m²)
 - Highway = 300-400 lbs/lane mile (20-40 g/m²)
- Allow time for CMA to penetrate and loosen the snow/ice pack before removing snow/ice
- Re-apply when new snow/ice accumulation shows first tendency to bond

HANDLING

- May be stored indefinitely if kept dry
- Avoid excess moisture which may cause caking
- Excessive handling may cause dustiness
